San Francisco, California · [linkedin](#) · [github](#) · [portfolio](#) · [email](#)

Self-taught full-stack developer with hands-on experience building and deploying React and Express web applications. Completed multiple web development programs and built a portfolio of full-stack projects including a booking platform and a recipe manager, both with user authentication and deployed backends. Known for working well under pressure, attention to detail, and a strong drive to ship things that work. Actively seeking a junior web developer role.

SKILLS

- Frontend: React, JavaScript, TypeScript, HTML, CSS
- Backend: Node.js, Express, SQL, Prisma ORM
- Tools: Command Line, Git, GitHub, Vercel, Render, Supabase, AI-Assisted Development

PROJECTS

Recipe App — React, Express, REST API, SQLite, JWT, Render

- Built a full-stack CRUD application with React, Express and SQLite, handling user registration and login via JWT authentication with secure password hashing
- Designed a SQLite database schema to manage recipes and user accounts
- Developed image upload feature using Multer with file validation
- Deployed backend on Render with CI/CD pipeline from GitHub

Airbnb clone — React, Express, REST API, PostgreSQL, Prisma, JWT, Vercel, Render, Supabase

- Built a full-stack booking platform with React and Express, featuring property listings, search and filtering by location, price, and category, and a complete booking flow
- Implemented server-side date overlap detection to prevent double bookings and JWT middleware to protect booking endpoints from unauthenticated requests
- Designed a PostgreSQL schema with Prisma ORM and deployed frontend on Vercel and backend on Render with automated migrations on every deploy
